Advancing
Migraine Management
in Primary Care

Are you ready to become a migraine **MASTERMIND**?

Join the new accredited online self-learning platform on **advancing migraine management in primary care**, offered by the **Canadian Headache Society**.

What you can look forward to...

- A flexible program that allows you to complete in your preferred order 4 interactive modules, exploring migraine management, from diagnosis to treatment:
 - » **Module 1:** Diagnosis and Lifestyle Counselling
 - » **Module 2:** Acute Treatment and Medication Overuse Headache
 - » **Module 3:** Preventive Treatments
 - » **Module 4:** Hormonal Factors and Auras
- Detailed video vignettes recorded with the mastermind's scientific committee
- Practice-enhancing real-life clinical cases
- The option of attending an Ask-the-Expert session to discuss frequently asked questions and challenges faced in practice with your peers
- **Mastermind** also offers a unique opportunity to integrate learnings into practice; complete the optional Chart Audit on the platform, and claim Linking Learning to Assessment credits.

What are the learning objectives?

- Review the diagnostic approach of headache and discuss lifestyle counselling for migraine
- Describe the management of acute treatment of migraine and medication-overuse headache
- Summarize first-line options for migraine prevention and define the place of second-line therapies (onabotulinum toxin type A and CGRP antibodies)
- Review the management hormonal aspect of migraine, including contraception in the woman with migraine with aura
